

**Are you interested in becoming a Clean Cities Stakeholder?**

**Clean Cities** offers our stakeholders an opportunity to get the information needed to make informed decisions on the use of AFVs in your business and to network with others in this rapidly expanding field. We have successfully been doing this since 1992.

**What is a Stakeholder?**

A Clean Cities Stakeholder is a member of the organization. **There are no membership fees or obligations**, however the stakeholder commits to:

- Support the goals of the US Dept of Energy Clean Cities Program, and
- Work with other coalition stakeholders to promote the use of alternative fuel vehicles, increase vehicle mileage and reduce heavy duty vehicle idling.
